

■ GEBERIT

Client:

Geberit Group

The globally operating Geberit Group is the European leader in the field of sanitary products. Geberit operates as an integrated group with a very strong local presence in most European countries, providing unique added value when it comes to sanitary technology and bathroom ceramics.

Solution components:

- Microsoft Office 365
- MS SQL Server Express
- Apache TomCat
- OnTime Group Calendar

Planning the Vacation Schedules for Geberit Using OnTime

By Using OnTime When Planning the Vacation Schedules for Geberit, the Process Becomes Much More Flexible and Expedient – But OnTime Does Much More Than That...

Previously, Geberit had been using Outlook for planning and scheduling within its sales teams, which are on average 10-40 people per team. However, Outlook showed to be inadequate in many areas. Therefore, Geberit decided to implement OnTime Group Calendar which meets many of their needs.

EASY OVERVIEW AND VACATION PLANNING

The top requirement for Geberit was vacation planning. Beforehand, Geberit had been using Excel print-outs, but these were often outdated and difficult to overview. In OnTime you can see long periods of time in one calendar view and even filter on specific Time-Off calendar entries such as vacation time, maternity leave and doctor's appointments. This allows users to easily gain an overview, coordinate employees' vacation time and take sudden changes into account.

” The top priority for us was vacation planning. OnTime allows our users to easily gain an overview, coordinate employees’ vacation time and easily incorporate changes making the entire process much more resilient. ”

Sascha Troll | Geberit Group

THE SCALABLE AND FLEXIBLE SOLUTION WE WERE LOOKING FOR

However, there were also many other reasons for choosing OnTime. One of these were that OnTime is more flexible, allowing users to customize the time frame and focus of the calendar view making it much more adaptable to work with. Another essential reason is that OnTime has great scalability, which means that many users can be seen in one calendar view. Besides from that OnTime works both better and faster leaving users time and energy to focus on their business instead. And these a just a few of many advantages of OnTime.

MANY MORE POSSIBILITIES IN ONTIME

Based on the many other features and possibilities offered by OnTime, Geberit is considering extending their use to other areas. Amongst others, they find a lot of potential in the ability to manage production workers by giving team managers the capability to plan and overview their team’s weekly production schedules.
